SUMMARY
REPORT

JANUARY 2018

ecoCity Footprint Tool Pilot

...ecological and carbon footprint
analysis for achieving one planet
living

FUNDED BY THE USDN
INNOVATION FUND

PREPARED BY:  

Results - Overview

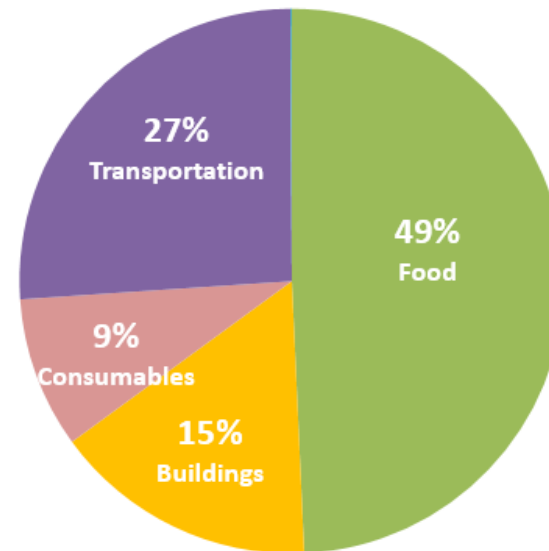

**Territorial
Inventory**
(“Traditional”)

**Consumption-Based
Emissions Inventory**
(CBEI)

**Ecological
Footprint**

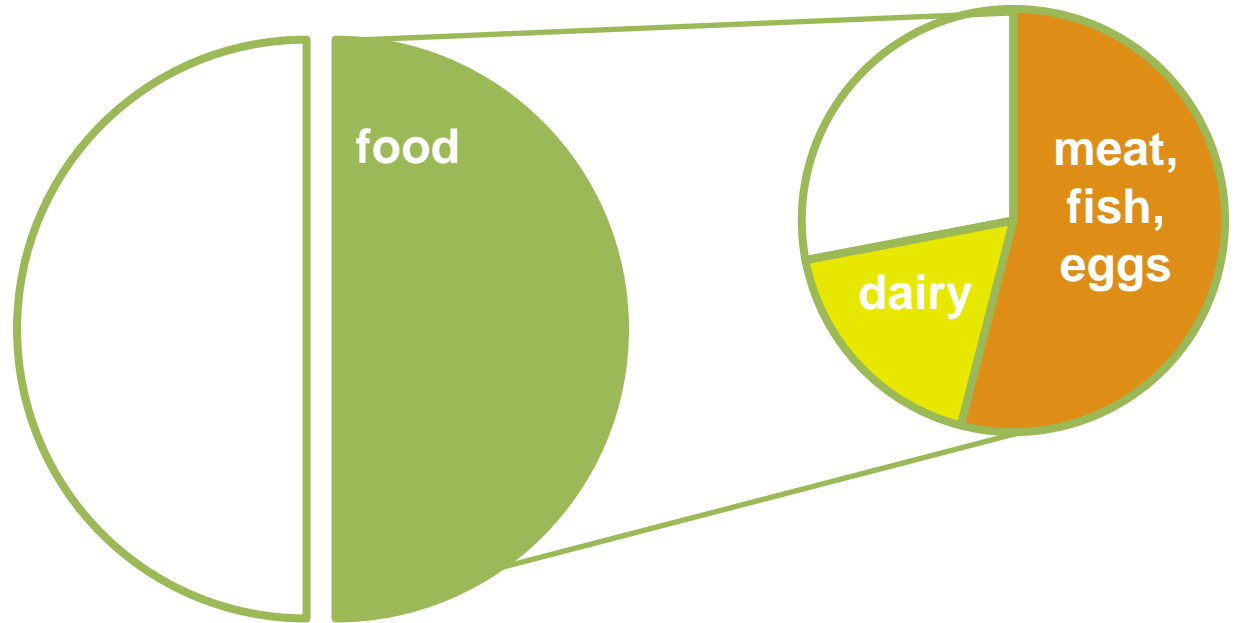

- *Waste/Consumables is a much lower component of the Territorial inventory*
- *In the CBEI the largest impact is transportation (52%)*
- *Food has a much greater impact in the EF*

Food

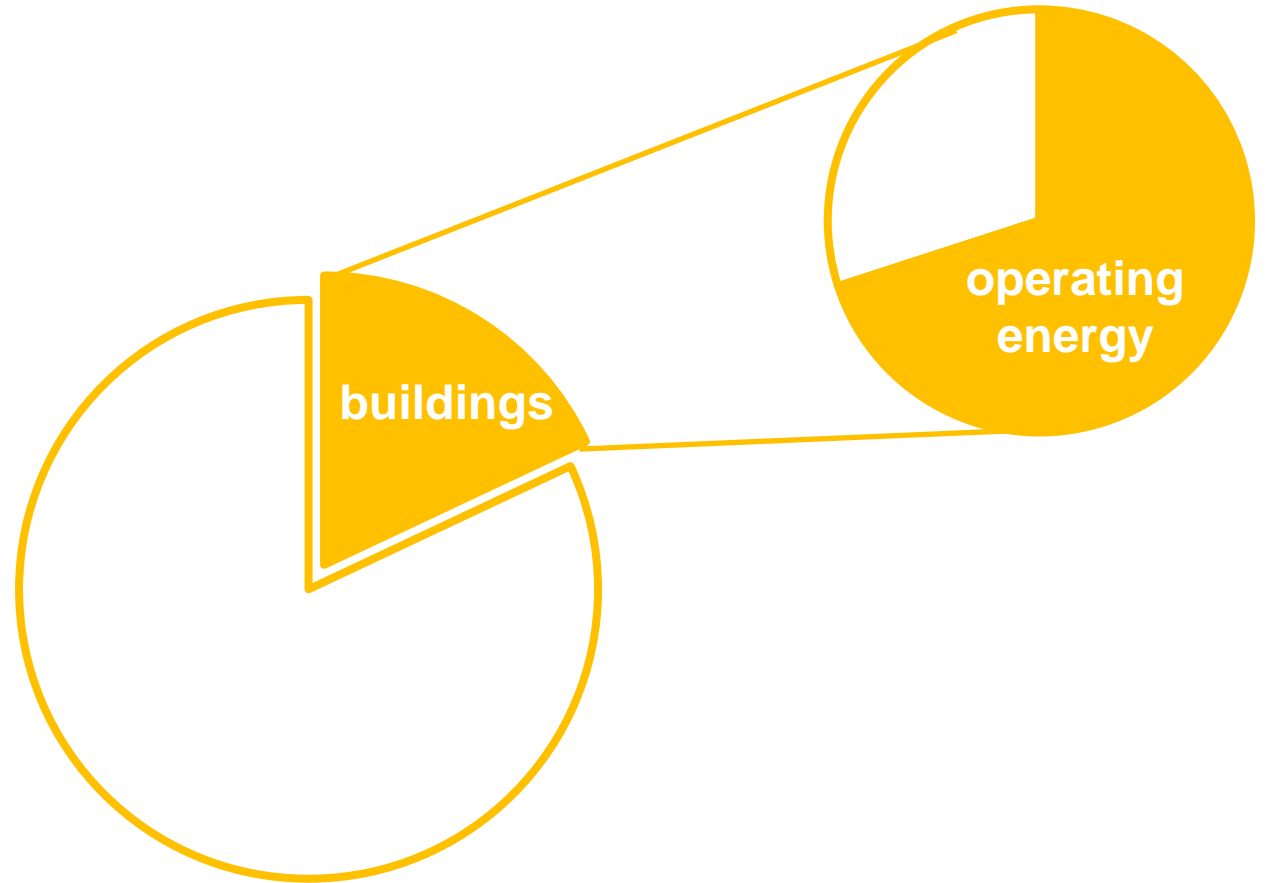

Animal proteins are the biggest factor in the food portion of the CBEI

Buildings

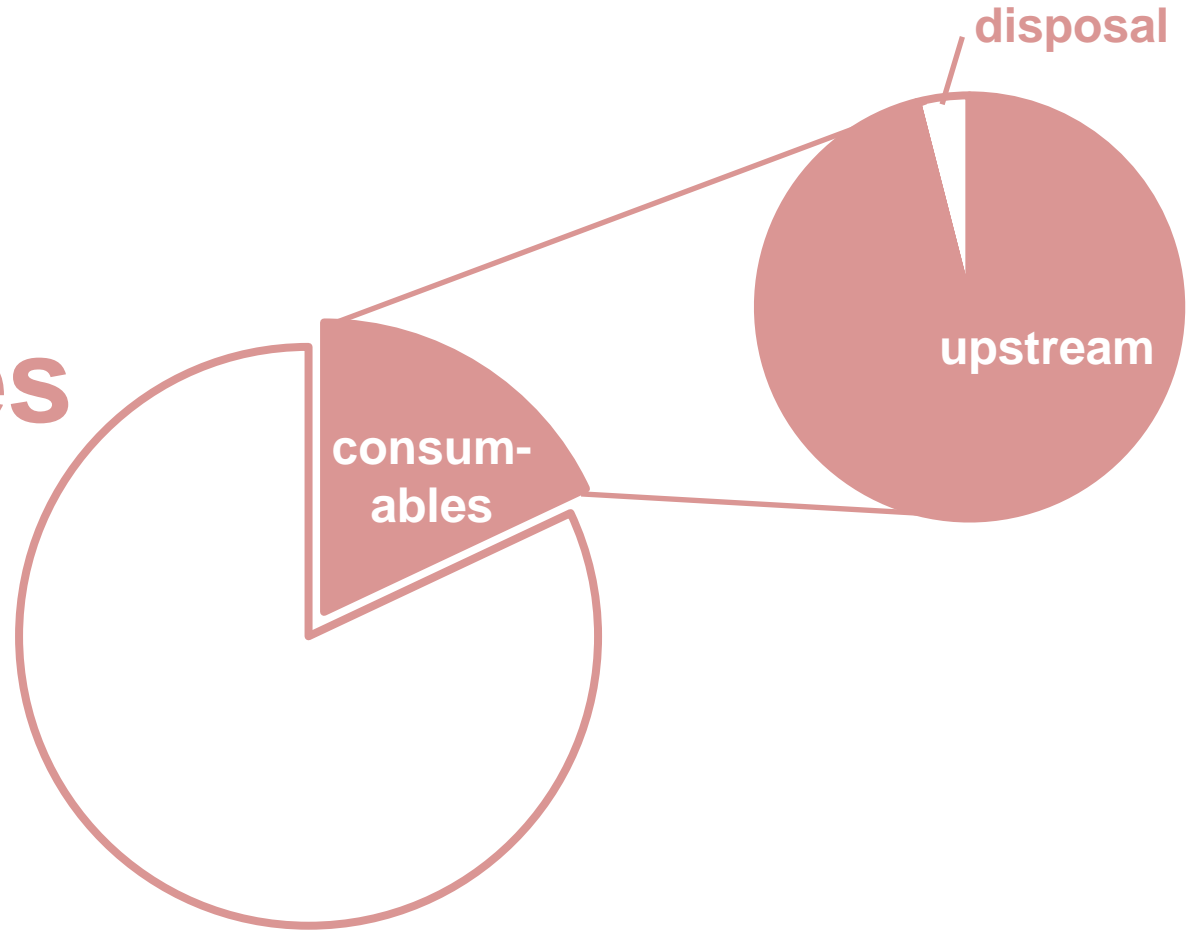

Dominated by
operating energy
This will improve with a
shift to renewables

Consumables Footprint

Consumables

Dominated by upstream impacts (not disposal).

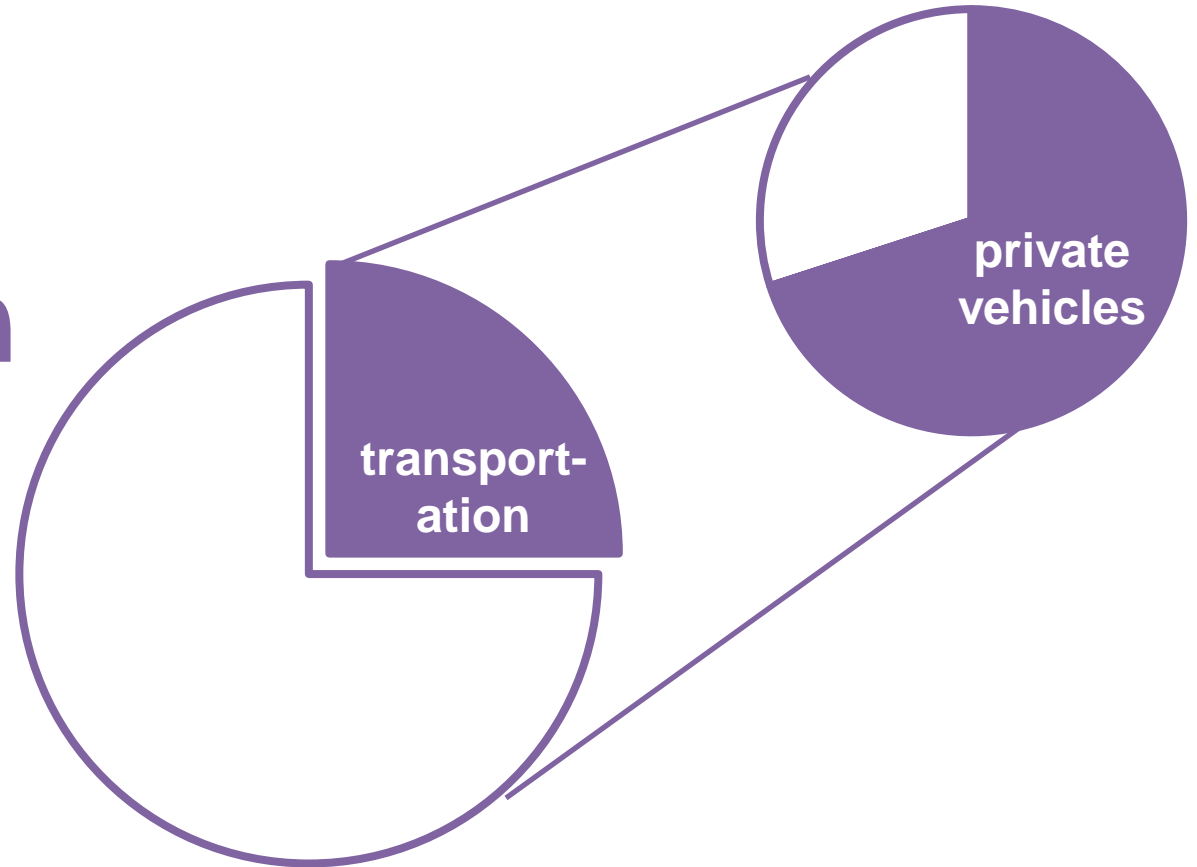

Transportation

Dominated by fuel use in private vehicles.

With embodied energy of vehicles, private vehicle transportation represents 2/3.

One Planet Living Framework

Core indicators:

- Ecological footprint
- Carbon footprint
