

# ***CREATING SUSTAINABLE CITIES***

***RICHARD IREDALE, PARTNER, IREDALE ARCHITECTURE***

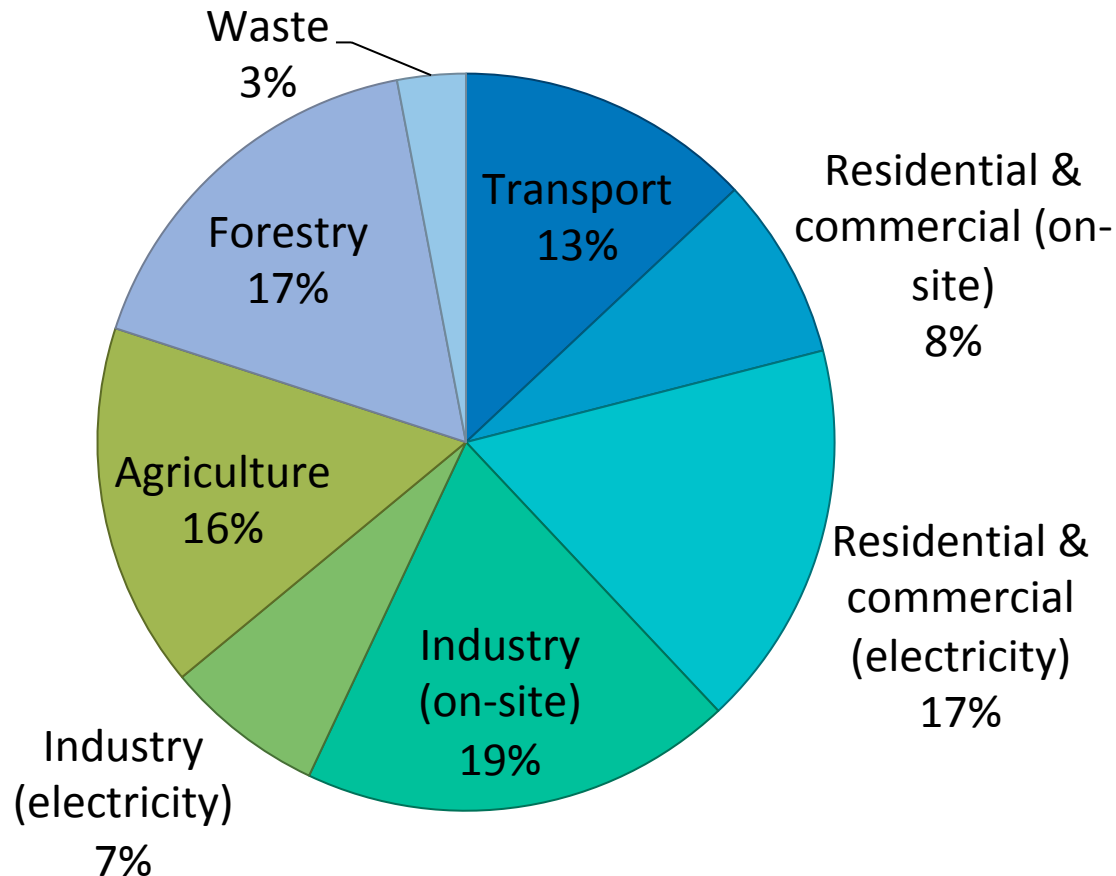

---

# *Earth in crises*

- *Mankind emits 10.5 Billion tons of carbon each year;*
- *5 billion tons is produced by the richest 500 million people*
- *only 6.5 billion tons absorbed by forests and oceans*
- *In Canada, average personal emissions are:*
  - *6 tons per year for suburbanites*
  - *4 tons per year for urban apartment dwellers*

# Where do GHGs come from?

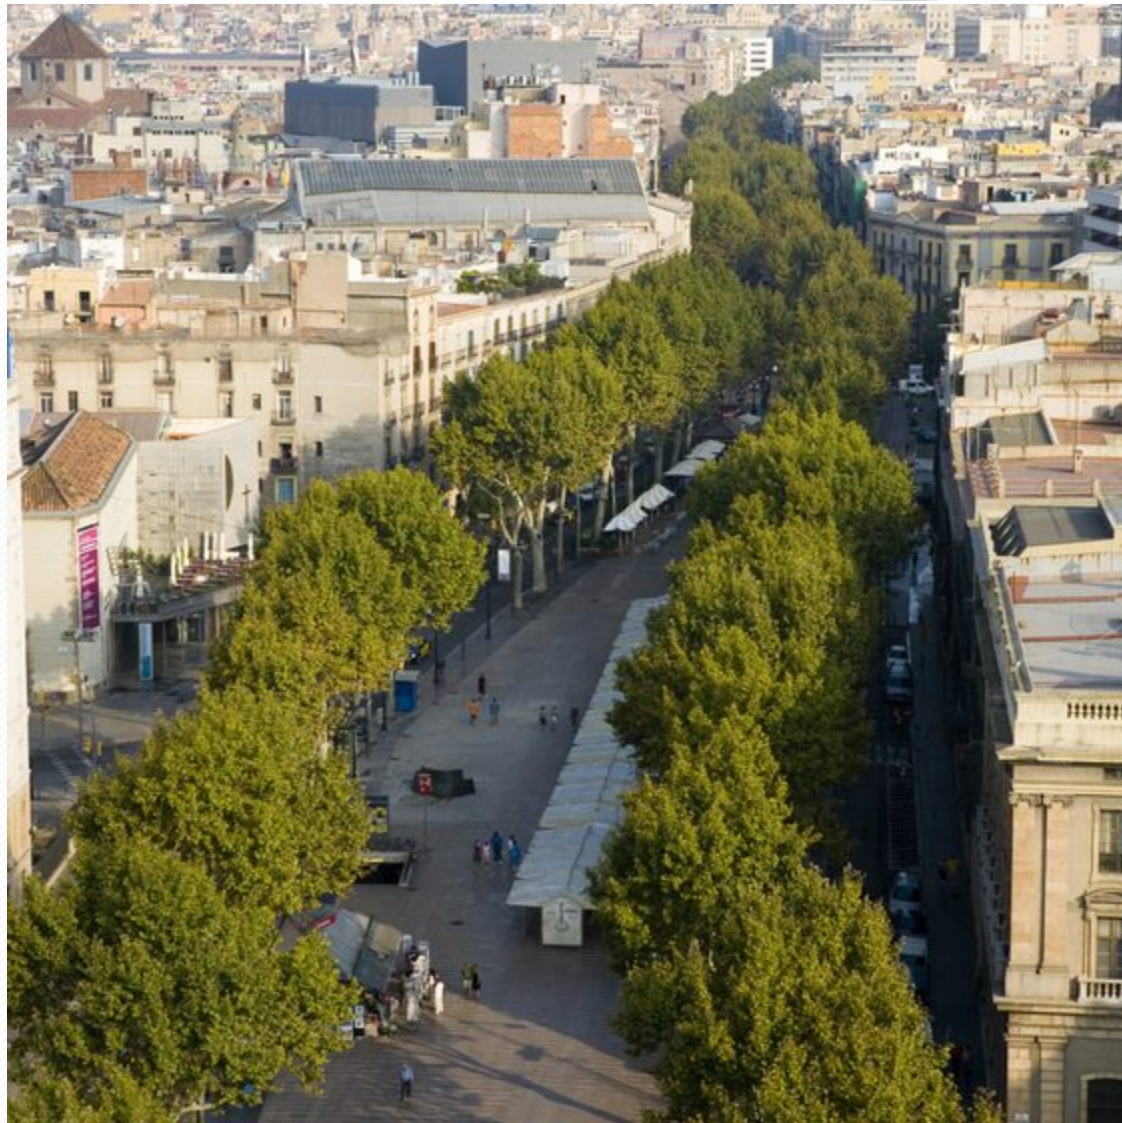

# *Cheongecheon river restoration*

## *Seoul South Korea*

# *The Vision : Green Cities*
