

PAUSE

Barrier both physical & non-physical have been placed to surround 'nature' maintaining a separateness. APT invite you into a relationship from an intercultural lens that reimagines what a future pathway could be. Yes there is beauty in our 'present' world but along the way to 'progress' many relatives & relationships have been sacrificed.

Welcome Friends & Relatives

a pathway together

We celebrated in the moon of SXÁNEŁ that APT is done/has life
(you might notice camas outside now & that the sky shows some special stars)

A Pathway Together:

- >Has several parts (Prezi ~Literature Review ~Executive Summary) creating comfort for the scholarly lens
- >Helps to bridge the gaps that have divided mainstream environmental movement for Indigenous & diverse peoples

>Provides an invitation to embrace the time of grey ... wisdom blended with action.

>Encourages humans to take a pathway towards Seeing Through Watchers Eyes

a bridge to environmental
movement for moving forward together

“to identify & create innovative
approaches to intercultural climate
engagement with Indigenous &
reverse lenses”

Pause & Consider

A Pathway Together

In a time of climate & justice crisis the only question we can ask is:
Where do we start?

Is centered in the homes of the **Coast Salish Peoples** ~ people of the longhouse with strong protocol
(hənq̓əminəm' ləkʷəŋən & **SENĆŦEN** speaking peoples)
